PROJECTS

Projects:

AI / Machine Learning Messaging App (In Progress)
- Developing an innovative messaging app incorporating machine learning and AI technologies.
- Designing and implementing the app's user interface and user experience (UI/UX) using React Native.
- Conducting rigorous testing and debugging to ensure the app's functionality and stability.

Property Management Website
- Designed and developed a custom website for a family rental business.
- Implemented a database to manage business-related data, listed available rental units, and enabled tenants to submit maintenance requests.
- Streamlined website functionality and improved user experience through responsive design and search engine optimization (SEO) techniques.

WORK EXPERIENCE

Mears Avenue Apartments — Canton, NC
Property Manager — January 2020 - January 2023

- Utilized database software to efficiently record tenant details, maintenance ticket history, and rent collection history, demonstrating proficiency in data management and analysis.
- Conducted criminal background checks and credit score inquiries on rental applicants to ensure a safe and secure community environment, resulting in successful leasing to most qualified applicants.
- Responded to tenant inquiries promptly and provided excellent customer service to resolve any issues with an apartment, showcasing excellent interpersonal and problem-solving skills.
- Collected digital or physical rental payments from tenants and recorded them properly, showing proficiency in financial management and bookkeeping.
